Our talented team are able to do any kind of event depending on your requirements, we would rather create a menu that suits your budget and needs than bombard you with endless lists of fillings and canapé choices.

We want to create bespoke catering for what you really want, with practical advice, we are always happy to meet personally to discuss and guide you to make the right food choices for your event.

All our food is home-made to the highest standard by our trainees and volunteers guided by our talented staff team.

We are proud that we create food in an environment to give young people on our training programme the opportunity to be proud of themselves and of what they help us deliver.
